Laura -

I've taken another stab at the rulemaking that is underway on NSPS OOOOa (New Source Performance Standards) for emissions from the oil & gas sector.

There was a national OOOOa workgroup meeting last Thursday when I was in SLC. A new due date was proposed for 12/12/17 when offices need to send an email in support (or not) of down-tiering a part of the rulemaking from Tier 1 to Tier 3. I had a couple of calls with team member son Friday and reworked my briefing paper for Doug accordingly.

There is no way to get this on one-page. I think this briefing focuses just on the (1) immediate decision to be made by 12/12; and (2) the biggest, most impactful changes to R8 of many that will be discussed on the 12/15 call with Pruitt.

I will be out of the office 12/12-12/13 at the annual methane conference (CH<sub>4</sub> Conference) so I need to send in r\* decision on down-tiering by COB 12/11.
